

重组人小分子胶原蛋白

Recombinant Human Micro-molecule Collagen III

小分子 易吸收 高活性 修复优

Small Molecules Easy absorption Highly Active Excellent repairing

五重分子量组合

分子量 500~5000Da

Five molecular weight combinations;

Molecular weight of 500-5000 Da;

✓ 采用人体**III型**胶原蛋白片段
利用**高表达酵母发酵**技术

Adopt type III collagen fragment of human body; Utilize
highly expressed yeast fermentation technology

✓ 应用范围广，**任何品类**的护肤产品均可添加

With a wide application range, it can be added into any kind of skin
care products

一种小分子胶原蛋白组合物及其制备方法和应用

A Kind Of Micro-molecule Collagen Composition And Preparation Method And Application Thereof

NO.: ZL202211290782.8

冀百康成熟配方 赋能下游应用

Gene Biocon's advanced formulations can help you go further.

维稳修护

Maintain stability and repair

重组人小分子胶原蛋白
Recombinant Human Micro-molecule Collagen III

+
多肽
Polypeptide

抗衰修护

Anti-aging repair

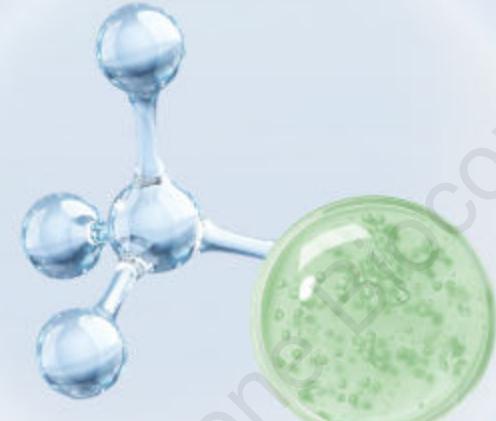

重组人小分子胶原蛋白
Recombinant Human Micro-molecule Collagen III

+
天然组合物
Natural composition

舒缓修护

Soothing and repairing

重组人小分子胶原蛋白
Recombinant Human Micro-molecule Collagen III

+
高活性酵母
Highly active yeast

抗皱紧致

Anti-wrinkle firming

重组人小分子胶原蛋白
Recombinant Human Micro-molecule Collagen III

+
传统中药成分
Traditional Chinese medicine composition

测试数据 Test Data

· 透皮测试 Skin penetration test

*数据来源：冀百康检测报告

*The data is from test report of Gene-Biocon.

小分子比中分子吸收率高达2.4倍

The absorption rate of micro-molecule is 2.4 times that of middle molecules

同配方的重组人小分子胶原蛋白经皮吸收率**明显高于**中分子配方，**吸收比率最高可达244.5%；**

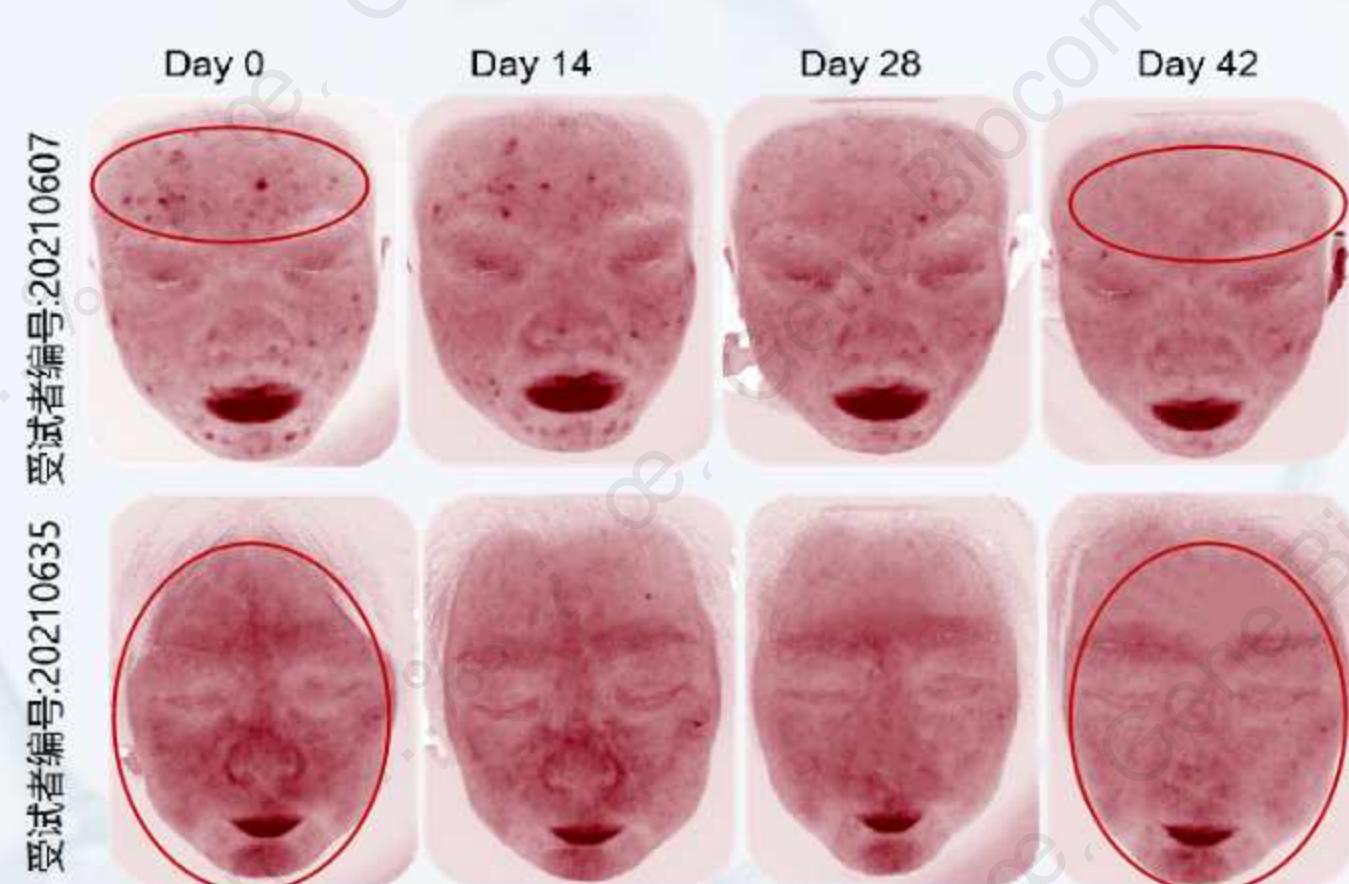

The transdermal absorption rate of recombinant human micro-molecule collagen with the same formula is significantly higher than that of midle-molecules. The highest absorption rate can reach 244.5%.

重组小分子胶原蛋白可作为储存库，具有**持续释放和补充游离胶原蛋白的潜力；**

The recombinant human micro-molecule collagen III can be a repository, with the potential to continuously release and supplement free collagens.

· 功效测试— 敏感、痘肌修复

Efficacy test — repair of sensitive skin and acne skin

利用RBX图像分析技术对反复痘痘肌、敏感肌进行连续42天的测试

The RBX image analysis technology was used to test the repeatedly acne skin and sensitive skin for 42 consecutive days.

使用含有重组人小分子胶原蛋白产品

- 14-28天后，痘痘、炎症程度**明显缓解**
- 42天后，**原炎症受损部位有明显修复效果**

After 14-28 days of using the product containing recombinant human micro-molecule collagen, the acne and inflammation was significantly relieved. The damaged part of primary inflammation was obviously repaired after 42 days.

*The data is from test report of Gene-Biocon.

· 安全测评— 人体皮肤斑贴测试

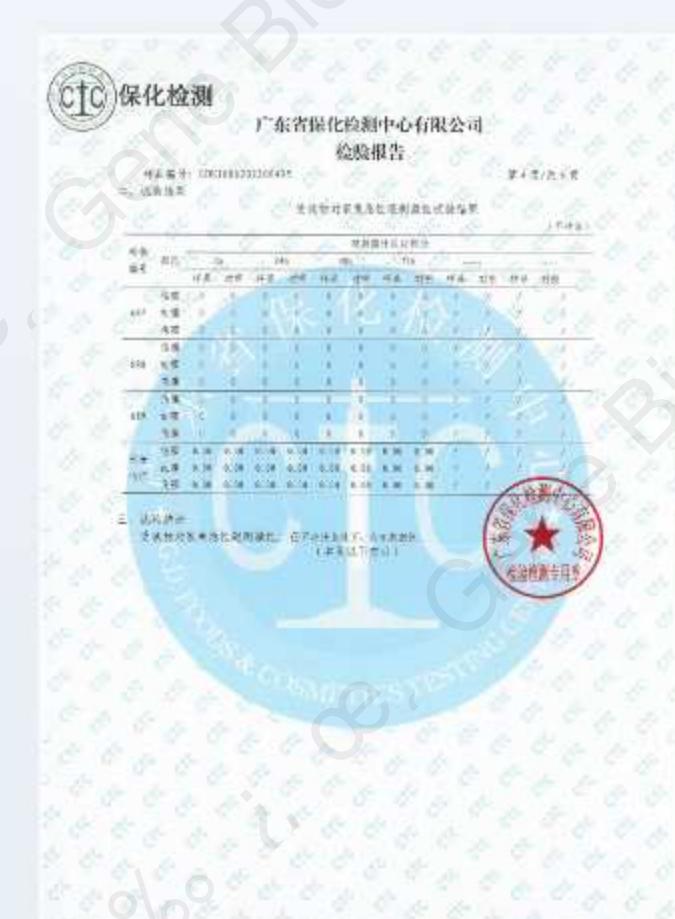

Safety evaluation — patch test of human skin

人体皮肤斑贴测试
Patch test of human skin

急性眼刺激性测试
Acute eyes irritation test

多次皮肤刺激性测试
Multiple skin irritation tests

重金属残留检测
Detection of heavy metal residue
